PROFILE

Final-year software engineering student at ESPRIT (Bac+5 engineering diploma) with full-stack experience in Java, Spring Boot, Symfony and Angular, plus real-time and Unity development. Seeking a 6-month end-of-studies internship (PFE) starting January 2027.

SKILLS

Languages
Java, Python, JavaScript, PHP, C#

Frameworks
Spring Boot, Symfony, Angular, React

Data and networking
MySQL, WebSockets, HAProxy and VMware (basics)

Game Development
Unity (C#) XR/VR Development
Blender

EXPERIENCE

Game Programmer Intern, *Lanterns Studio* 06/2026 – 08/2026
Developed "The Long Way Out," a 3D platformer (Unity 6, Blender) starring a bug navigating hazards, unlocking abilities, and encountering other bugs while escaping into the outside world

Software Developer Intern, *Tunisie Sécurité* 01/2024 – 05/2024
Developed a full-stack platform (Angular, Spring Boot) for a cash-in-transit company to manage fleet/agency data and optimize multi-stop transport routes (via Leaflet API), including distance and travel time estimates
Implemented real-time data synchronization using WebSockets

Web Developer Intern, *Easyward* 01/2023 – 02/2023
Developed a web application using Angular and PHP.
Worked with WordPress and client management systems.

EDUCATION

Software engineering, *Esprit, Higher School of Engineering and Technologies* 09/2024 – Present
Bac+5, Master's level Tunisia

Bachelors Degree in Computer Science, *ISET Rades* 09/2021 – 07/2024
Tunisia

High school diplomas: Economics and Management, *Lycée Ali Douagi la Marsa Saada* 09/2017 – 07/2021
Tunisia

PROJECTS

MEGANOPOLY, *XR multiplayer game for Meta Quest*
Designed and developed MEGANOPOLY, an XR/VR immersive reinterpretation of Monopoly where players physically navigate a life-sized, interactive game board. Built core gameplay systems (turn logic, property/rent management, dice mechanics) and 8 original culturally-themed mini-games with scalable difficulty, plus gesture-based interactions and spatial multiplayer trading

Magic Arena
Developed Magic Arena, a completed VR combat game for Meta Quest (Unity 6, C#) featuring voice-activated elemental spellcasting, adaptive enemy AI, and puzzle-gated level progression across 3 levels of wave-based combat.

Health platform, *Symfony web app and Java desktop app*
- Built a medical web application with Symfony and PHP, with a MySQL database managed through phpMyAdmin
- Patients describe their symptoms and an AI assistant suggests suitable medications; they can then book an appointment with a doctor
- Doctors receive appointment requests, schedule them and manage a calendar
- Built a Java desktop version of the same application
- Deployed on a local network across 3 computers, one each for frontend, backend and database

BAD ICE CREAM 3D
Developed BAD ICE CREAM 3D, a 3D multiplayer arcade game inspired by the classic Bad Ice Cream, featuring AI-driven fruit behaviors and competitive enemy mechanics. Integrated Unity Gaming Services for player authentication and matchmaking.

LANGUAGES

English
Professional

French
Fluent

Arabic
Native

CERTIFICATES

ReactJs Training, GoMyCode
Manipulating ReactJS and its methods

Web Development Training, GoMyCode
Covered fundamentals of modern web development (HTML, CSS, JavaScript,).

LEADERSHIP AND SIDE WORK

- Leo Club Tunis Ares: President 2025-2026, previously vice president and HR manager
- Custom 3D prints: run a side business selling custom 3D-printed items
